PROGRAM DESCRIPTION

As of October 1, 2018 Pennsylvania updated the building codes from the 2009 to the 2015 version for all of the International Code Council Codes – residential and commercial. The focus of this presentation is the IBC which addresses all commercial structures. This presentation will review changes to concrete masonry unit web requirements, the updated unit strength table, and more that will show greater efficiencies for the masonry walls in many aspects which makes for a more affordable wall with greater energy efficiency.

PRESENTER

Jason Thompson, Vice President of Engineering ~ National Concrete Masonry Association
Jason is active in the development of building codes and standards for masonry structures and systems where he represents NCMA and the masonry industry through the Masonry Alliance for Codes and Standards.
